Graduate Team Leader at Illinois Geometry Lab, *University of Illinois at Urbana-Champaign* Fall 2019
Faculty mentor: Katelyn Leisman.
Project: *Simulating Multi-Soliton Solutions to NLS and KdV and Studying Interactions*

- Our team focused on the nonlinear Schrödinger (NLS) equation with nonzero boundary condition and studied the exact solution of a one-soliton solutions. We compared the solution of those with zero boundary condition, and used Python to generate figures and animations for the solution.
- Duty
  - Held weekly meetings and provided Python and LaTeX supports to the team.
  - Supervised on the mid-semester presentation and the open house event
  - Helped the team to formulate final report.
